DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 2, 5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis (4,076,123). Davis discloses the limitations of the claims including a plastic container lid (figs. 1-4) comprising a body/mirror (10), skirt (12), rim (34), outer part (upper portion of 14), bridge (24), odd number of evenly distributed bridges (fig. 1), wherein said bridges are 3mm or more in width (col. 2, line 40).
- 3. Claims 1, 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurtt (3,474,928). Hurtt discloses the limitations of the claims including a plastic container lid (figs. 1-5) comprising a body/mirror (14), skirt (26), rim (28), outer part (fig. 5, portion between members 22 and 28), bridge (space separating rim members along a circumferential line) and six or more evenly distributed bridges (fig. 3).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3781

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1, 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mahaffy et al. (3,883,036) in view of Edwards (3,321,104). Mahaffy et al. disclose the limitations of the claims including a plastic container lid (figs. 1-7) comprising a body/mirror (central body portion), skirt (6), rim (16), outer part (7,17) and a bridge (20). Mahaffy et al. exclude what Edwards teaches, a recessed segment having a two part formation with negative angles (fig. 5, 26b) thereby providing a stabilizing structure for a lid. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to modify Mahaffy et al. with the negative angle bridge portions in order to provide an alternate stabilizing structure to said lid.

Conclusion

6. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments

made to the disclosure. See MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher B. McKinley whose telephone number is (571) 272-3370. The examiner can normally be reached on Monday-Thursday, 7:00 AM 5:30 PM.
- 8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick can be reached on (571) 272-4561. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
